Like Money in the Bank

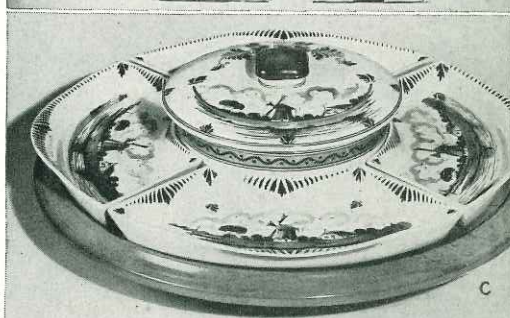

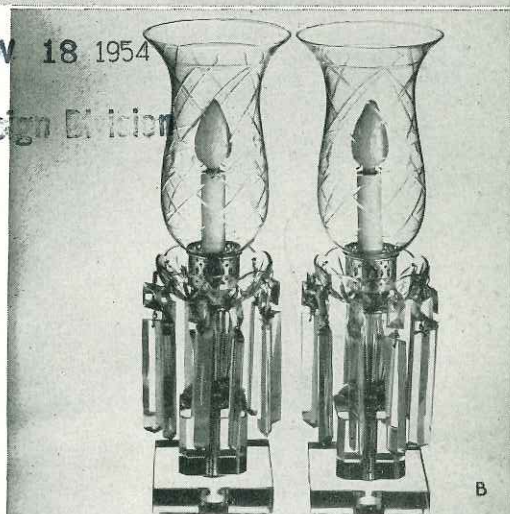

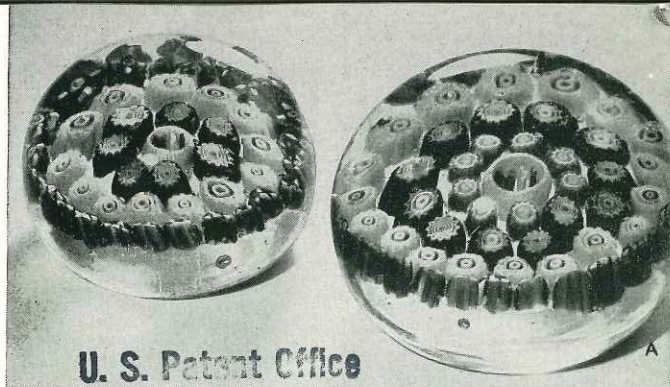

A 666—In recent years the trend towards collecting paper weights has become quite a hobby and as a result, collectors and antique dealers throughout the country are eagerly searching for specimens. The weights most popular are those called Mille Fiore, colored glass gathered to form a tessellated design. In some weights the date of production is inconspicuously placed in the design, usually in one of the small circles. These dated paper weights are scarce, consequently rare, and are commanding very high prices, usually from \$250 to as much as \$1,500. A check of antique dealers and recent auctions will verify these figures. Such paper weights specially dated for 1954, made exclusively for Plummer according to previous records would increase in value more than 20% each year. In the meantime, as they are reaching maturity the pleasure of possession of these useful, interesting and ornamental pieces will more than repay the original investment. Of additional interest to the collector is our intention to continue each year to date these paper weights so that the collector may have the opportunity to build a growing and matching collection in consecutive order. In view of their being made in limited number, we suggest you order early. Each \$10.00 (dia. 3¼ ins.) and \$12.00 (dia. 4 ins.) (wtg. 4 lbs.).
